# Young

**PHOTOGRAPHY BY ANDREW DUNN**

When you're young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

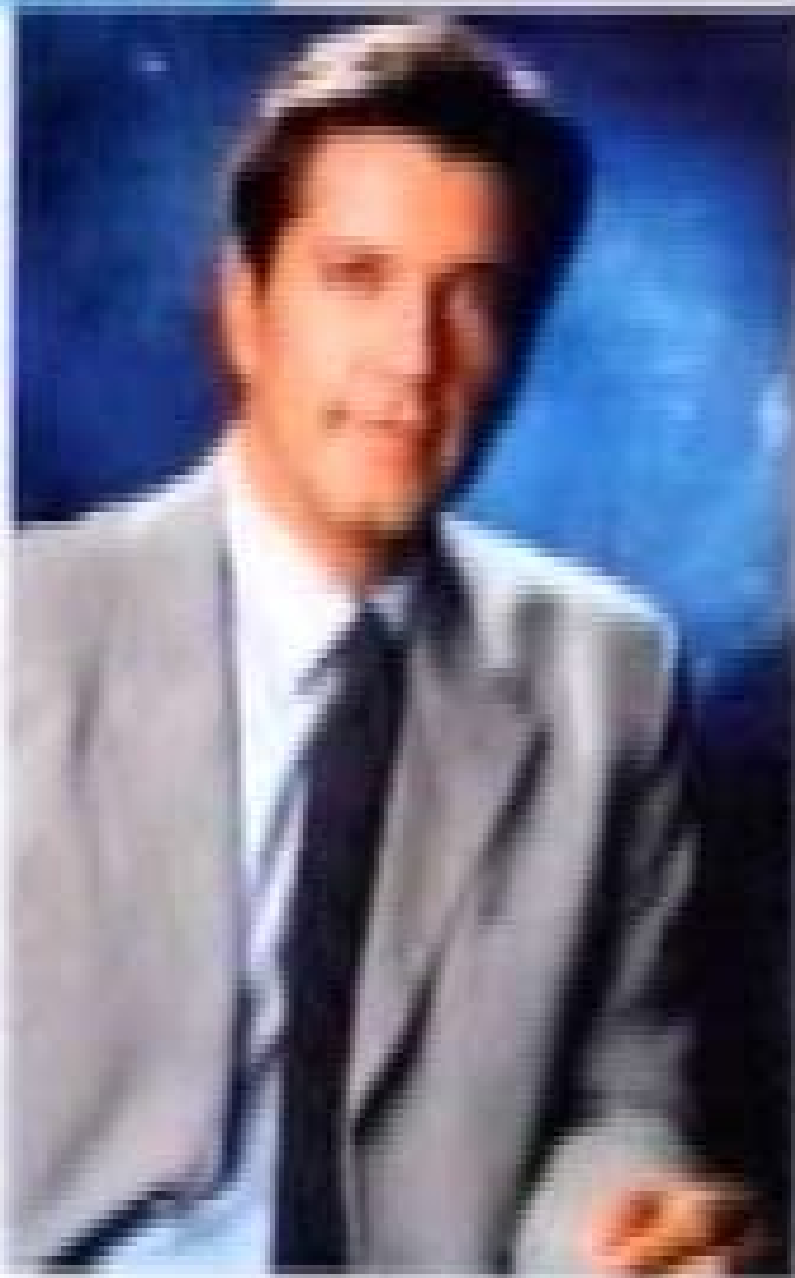

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.

You're not young, you're young. You're not young, you're young. You're not young, you're young.
